Heathdale Happenings

A very large crowd attended the community card party and dance held Friday evening in the Cloverleaf school. All report a good time, and the dancing was kept up till late in the morning. Honours in the Five Hundred game were won by, ladies first, Miss Hazel Brostom; consolation, Mrs. Erickson; gentlemen first, George Perren; consolation, Ray Osterberg. The next community evening is set for February 6th.

Mr. and Mrs. W. Shier and family were guests on Sunday at the W. Anderson home.

Mrs. A. Neff visited at Mr. and Mrs. J. C. Turpie's home and also at their parents' in Chinook during the week end.

Mr. and Mrs. W. W. Wilson, and Miss Laidlaw were guests of Mr. and Mrs. Harrington's Sunday afternoon.

H. Trojan, Mr. and Mrs. G. Trojan and son Ray, and Mr. and Mrs. G. Thompson and family were guests on Sunday at the home of Mr. and Mrs. Leftwich.

Mr. and Mrs. E. B. Allen and family were dinner guests Monday evening at the home of Mr. and Mrs. N. D. Stewart at Coltholme.

U.F.A. meeting will be held at Cloverleaf school next Saturday afternoon at 2 p.m., when the delegates' report of the Calgary convention will be given.

Mr. and Mrs. Leftwich spent Monday evening at the Hobson home.

E. B. Allen and N. D. Morrison returned from Calgary last Saturday.

Dominion House May Meet March 12

March 12th was forecast in government circles Monday as the probable date for the meeting of parliament, with the intervening period devoted to preparation while the arrival of the new governor-general is awaited.

The first thing necessary when parliament meets will be to get through an interim supply bill as the fiscal year will end on the 31st and appropriations before that are vitally necessary.

Peyton Pickings

An exceptionally large crowd attended and enjoyed the card party and dance held at Cloverleaf school on Friday, Jan. 23.

Mr. and Mrs. A. Bjornsrud were dinner guests on Saturday evening at the home of Mr. and Mrs. Geo. Hutchison.

It is with great sorrow that we announce the death of 'Zip,' Richard Maywhere's pet dog.

Mr. and Mrs. F. W. Hobson visited Mr. and Mrs. J. Haggerty last Sunday.

Mr. and Mrs. Letchridge, of Heathdale, spent Monday evening at the Hobson home.

Miss Julie Peyton spent Friday afternoon with Mrs. Warren, and then attended the dance over at Cloverleaf.

Ray Robison is under the weather with the flu this week.

Mr. and Mrs. Eben Roy, of Youngstown, visited at the home of the latter's sister last Saturday.

Mr. and Mrs. Walter Anderson entertained Mr. and Mrs. W. Shier on Sunday last.

Unemployment Main Problem Before House

With the opening of the Alberta legislature today unemployment, natural resources, and irrigation will be the three big questions to be dealt with.

They are all recognized as questions of great moment, and Premier Brownlee in announcing the government programme of public bills, said that while there will be fewer pieces of legislation, as anticipated, these three items alone will be more important and may involve more discussion than any sessional programme in several years.

Nevertheless the premier is hoping that the house may conclude its work by March 20, and that date for the closing is not being taken as a working basis. All the bills are well in hand and the several pieces of government business will be brought promptly before the house.

Attention is to be directed first of all and to as full an extent as may be found necessary to the matter of unemployment and relief, and legislation will be introduced to ratify the agreements with the Dominion government and the municipalities providing for raising necessary funds with which to meet expenditures for works and relief.

Next in importance to the unemployment question will be that of legislation dealing with the transfer of the natural resources. Under this heading five separate but related acts will be introduced as follows: An act formally setting up the department of lands and mines; a water power act, providing for the administration of all waterpower in the province; a provincial land act; a fisheries act; and a forestry act.

It is expected that mines and mining leases will be administered under the Provincial Lands Act,

Third place on the agenda in order of importance is given to legislation following upon the report of the Wilson commission on irrigation. The recommendations in that report will be dealt with, and as these concern the new west irrigation as well as the Lethbridge Northern irrigation scheme, there will be amendments to all the irrigation acts.

Watering Of Stock

During the past week it has been brought to public notice that there is more or less suffering among stock on account of shortage of water. There is no snow to make moisture for animals running in the open, so that farmers have had to look up their stock and see that they get the necessary water regularly.

There are some men, however, who do not seem to give this matter a thought, but leave their horses and cattle to find water for themselves, or depend on their neighbors to give them a share while supplying their own stock. Now that the supply is running short a man will naturally look after his own first and expect others to do the same.

The Advance has been informed by a reliable farmer of a case of a horse which had been neglected by its owner until it had stood for over twenty four hours in open, supposedly dying for the want of a drink. Such a case should be reported to the proper authorities and if proven the owner should be punished for such negligence.

Mr. and Mrs. Eben Roy, of Youngstown, visited at the home of the latter's sister last Saturday.

Mr. and Mrs. Walter Anderson entertained Mr. and Mrs. W. Shier on Sunday last.

R.A. 6's Win 4-3 Over Vikings

Hockey fans were thrilled by a brilliant display of speed and form when the R.A. 6's clashed with the Flying Vikings of Cereal, on Saturday.

The game was marked by dashing solo rushes down centre ice with—or without—the puck, and passes completed similarly.

Line-up

Chinook—Coach, Butts very ably ladled the puck out of the local goal, with Jacques, Lee, defence; W. Lawrence, Cooley as forwards, and C. Otto centre, Subs—Robinson et al., Nordick half-back, Peterson roamer.

Vikings—Goal, Pete Ness; defence, O. Kasa, M. Wold; forwards Geo. Peterson, W. Wold; centre, Sandy Kasa.

The fans will be delighted to hear that Managers Lawrence and Magnuson have arranged for these teams to meet again at an early date. In the meantime the R.A. 6's are under rigid training rules. The manager states he has a "dark horse" or a "reconditioned Viking" to augment the defence in the next game.

Chinook vs. Youngstown 2-2

In the next game, played on choppy ice, Youngstown scored in the first period with a roller, then again in the third with a goal shot by Prudy.

Chinook scored once in the second period on an error by a Youngstown player and again in the third on a long shot by H. Vanhook from his own blue line.

Youngstown—Goal, T. Murphy; defence, Furdy, H. Wells; forwards, Springbett, Mellom; centre, P. Wells; Sub., W. Coad.

Chinook—Goal, Knibbs; defence, Brownell, Massey; forwards, Peyton, Vanhook; centre, Brown, Sub., E. Robinson.

Coltholme Collections

During a dust storm which swept the district late last fall, S. Britton was one of the many farmers who had his windmill badly demolished by the wind. Not until last week was he able to put it up, and then it was put up with the able help of Mr. Hill, J. D. MacKinnon and Richard Thompson, the latter supervising the job and handled the centre guide line himself. After the windmill was safely erected the ladies served tea. The party was then entertained by S. Britton and J. MacKinnon, who danced what they called the Highland Fling. Mr. Hill very ably supplied the music. Not until the late hours of the evening did the party retire to their homes, and they all went away feeling much happier than when they came.

Mr. and Mrs. J. Duncan spent Sunday afternoon at the home of N. D. MacKinnon.

Next Saturday, Jan. 31st, at 2 o'clock, there will be held in the Cloverleaf school a U.F.A. meeting for the purpose of hearing the delegates' report. This meeting will be followed by a meeting of the members of the Coltholme Horse Breeders' Association.

E. B. Allen and N. D. Morrison returned from Calgary last week end, where they were attending the U.F.A. Convention.

N. D. MacKinnon and family spent Friday evening last at the home of H. H. Dunster.

John McLennan seems to be the only trapper in the district who has caught anything. He has recently captured a number of weasels.

Messrs. E. and L. Allen are busy constructing a windmill for

CHINOOK MEAT MARKET

Hoist Ship Through Window

When it was decided to exhibit in a London department store for the Christmas season, the historic half-ton water-line model of the Canadian Pacific super-liner "Empress of Britain" which had been featured a few weeks previously in the Lord Mayor's Show, it was found necessary to lift the model above forty feet in the air so that its great size might be appreciated by the public. To accomplish this an upper window. The photographer has caught the scene just as the model is entering the window. Traffic was blocked for an hour during the hoisting of the model, which was carried out with complete success.

At the annual meeting of the ratepayers' of the Myrtle S.D., John MacPherson took the place of C. B. Hittle, the retiring trustee.

The annual meeting of the Coltholme Nazarene Church was held last Tuesday at the home of Alan Spreeman.

Read For Recreation and Profit

If we are to believe what the daily press tells us—and doubtless in the main it gives us all of truth it can find—a certain professor in a United States university has written a book on "The Art Of Rapid Reading." He says that a fast reader—and almost anybody can become one by trying—can get away with 130 books a year, or around twelve a month; and if this swift reader will give but two hours a day to the matter he can read 12,960,000 words a year, which would be around 36,000 words a day. And this, mind you, exclusive of newspaper and magazine reading. Just books, you know. The professor says that any fairly intelligent reader can teach himself to read at least half again as fast as he now does.

I have not seen the professor's book, and if I should come across it, I am not likely to read it. The scope of my ambition does not embrace a desire to be a "rapid" reader. I do not wish to set myself a stint of so many books to be travelled through swiftly within a given number of months, or weeks, or days. I can get along nicely without being able to boast of having scanned 12,000,000 odd words in a twelvemonth, and I cannot muster regret at the end of a busy day if I have not done my daily 30,000 words, or ten thousand, or one thousand, or none at all. In fact, I could run quite happily and profitably for a considerable number of days without having seen a printed or written word and without having written one. I could spend the time just thinking over what I had read and deciding how much of it was worth remembering.

Why do we read? More particularly, why do we read books? Doubtless each one would give a different reason for reading, but in a general way, we read for information, for entertainment, for self-improvement, and for pleasure. I like to read in much the same way as I go for a walk. A reasonably rapid pace when the body is open and there is much in the surroundings to attract attention; slow pace when I enter the woods or where the animal world is inviting; a pause for some particular view or to listen to the song of a bird or to watch the ever-changing tracery of the mist in the valley or around the hill tops or to survey over the girth and height of some forest giant; to throw myself at full length on a bank of moss and just dream. But never in any circumstance to gauge or value the world by the number of steps I may have taken or the miles I may have travelled.

We walk for recreation—the re-creation, refreshment, upbuilding and unfolding of our bodies and minds. When we have the choice we should read for recreation, for profit, for mental and spiritual benefit, for pleasure, lasting pleasure. We should read as a prospect for gold, rapidly, if we wish, where there are no signs of buried treasure, carefully where the "color" shows, and with infinite leisure but keen alertness when we strike a vein or discover a nugget. For it is the nuggets, the gems, buried in the printed pages of books which give zest and zest to reading and the discovery of which repays richly for the time spent.

Not how fast can you read, but how thoroughly, should be the chief rule for any reading that is worth while. Reading which is not worth while is sheer waste of time. Reading for the beauty of style and of thought and of expression, savoring each polished phrase as you would savor the daintiest morsel of food, till you have drawn from it all of its flavor and taste and charm. Your inner ear attuned to catch the music of the words. Your fancy alert to catch the play of fancy of the writer. Pausing now and then to chase to its last every word you do not understand. That is the way, I take it, to read, when it is your choice to do so, for pleasure and profit.

You may read 30,000 or 50,000 words a day and add nothing to your store of knowledge or your gallery of beauty. And you may read no more than 5,000 or even 1,000 words a day and add generously to your mental treasure house. You see, it is all in the quality and not at all in the quantity of the words. And, the pleasure you gain from your reading—especially your chosen, leisurely reading—will depend on the setting of your reading pace to your capacity for getting all out of what you read that the writer put into it.

If you can read rapidly and thoroughly, well and good; but above all things else, read thoroughly. And don't let it trouble you in the least if you come upon some seven-league-boots reader who can dispose of ten books to one. Of the making of many books there is still no end; but once in a long while a real book appears. It may be worth while to give this a year of leisurely reading and let the other 120 you might have "read" pass into the place of forgotten things, as the most of them are sure to do anyway.

Don't try to match the mass production of the publishers with mass reading. Better give 12,960,000 seconds to thinking than to rapid scanning of an equal number of words, if you cannot compass both. Don't read so much that you have no time left to think over what you read or have read. Taking the matter by wide, you will get more profit and pleasure out of than out of rapid reading, and you will have time to garner the gems, to listen to the music and to revel in the beauty inherent in all good writing.

Largest Year "Salada"

Tea Has Ever Known

Tremendous Increase In Sales Is Reported For Last Year

At the annual sales conference held at the Royal York Hotel, Toronto, Mr. Arthur M. Wilson, secretary-treasurer of the company, stated that in spite of the fact that the year 1930 was one of depression, generally, the "Salada" tea sales showed a tremendous increase and were the largest the company has ever experienced.

Fertilizer Production

Over Twelve Million Dollars Was Value Of Fertilizers Produced In Canada In 1929

Production from plants in Canada engaged primarily in the manufacture of complete fertilizers amounted in value to \$2,258,780 in 1929. In addition, fertilizer materials such as cyanamid, ammonium sulphate, animal tankage, ground bone and fish fertilizers were made in factories classified under other industries; in 1929 the production value of these commodities totalled \$12,090,763.

Palpitation Of The Heart Nerves Were All Gone

Miss Rose Griffin, Ashern, Man., writes: "About five years ago I was troubled with palpitation of the heart, caused by a shock, and pain in the heart area which could not sleep. I read about Milburn's Heart Nerve Pills and decided to try them. After I had taken three boxes I was feeling fine again. I think they are a wonderful remedy, and anyone who suffered as I did would give them a trial."

Device For Astronomers

Revolving Platform Enables Star-Gazers To Change Their Position

A piece of machinery to enable renderers of the stars to ride has been built by the General Electric Company at its plant in West Lynn, Mass., and is on its way to a Harvard University observatory in South Africa.

The device is an observers' platform, which revolves in any position, enabling the astronomer following the course of a star to change his position with the rotation of the telescope. It is operated by electric motor, with push button close to the observer's hand.

The platform was designed at the suggestion of Dr. Harlow Shapley, director of the Harvard astronomical observatory. It is to be installed in the Boyden Station of the Harvard Observatory at Bloemfontein, South Africa. It will be used with a 60-inch telescope.

Denouncing financiers who "ought to be picking oakum instead of picking pockets," and referring to the iron and steel industry, he said:

"When I took office, most of what I had was in that ancient industry. Shares I now hold, and which I held then, and could have sold for three pounds (\$15) each, today are worth twenty pence. No cataclysm on earth can bring them back to more than a fraction of their ancient value."

"It may have been bad business on my part, and many business men will say it was, and that I ought to have stayed at the top of the market, but when you have an old name in business, again, which nothing has ever been said in this world, and when you know the public have gone into the business on the strength of that name, it is an impossibility to throw your shares on the market when you know the loss will fall on them and not on you."

"Now, I have nailed my colors to the mast of that ship of British industry, and I do not regret it. We shall never gain new predominance without the absolute and honest sincerity of those who conduct business in this country and apply true, honest workmanship in the goods we sell."

Voices Traced To Wireless

Radio Set Left Turned On Had Policeman Gassing

Flying squads, a Black Maria, and foot police were called out when a policeman heard voices in the bar of the Gardeners' Arms, in Nelson Street and High Friars Street, Newcastle, England.

The building was surrounded and a crowd quickly gathered while the police examined the premises. Not a single window had been left open, nor was a single Jeremy mark marred a door.

When the police eventually gained admittance they found that the wireless set had been left on when the premises were closed earlier in the day.

The voice the policeman had heard was the voice of Dean Inge broadcasting.

In all infantile complaints that are the result of the deprivation of calcium, the stimulant and corrective Miller's Worn Powders will be found an effective remedy. They attack the cause of these troubles, and by expelling the worms from the organs of the child, restore the child to health, without which the child cannot maintain its strength or thrive. These powders mean health and improvement.

Canned Soup Factory

New Industry To Be Established At Calgary

Arrangements for the establishment in Calgary of the first canned soup factory in Canada west of Winnipeg, are being completed at the present time, and the new Alberta product will be on the market early in the year, it is announced by Burns & Co., Ltd. Investigations have been underway for some time as to the possibility of replacing imported soups by soups of local manufacture—the former, it is said, amounting to \$750,000 annually in Alberta alone.

Persian Balm creates lovely complexion, Velvety smooth. Cool and relieves the skin. Makes it delightful to touch. Use. Swiftly absorbed by the tissues, imparting that elusive charm so distinctive of the dainty woman. Persian Balm protects the delicate tissues from the ravages of the harshest weather. The loveliest complexion. Every discriminating woman should use this silvery lotion. It is unrivaled as a favorite aid to beauty.

Experiment Being Watched

Airmail and transport pilots in Chicago await with interest the result

of experiments now being conducted by the U.S. Bureau of Standards which, if successful, will prevent airplane collisions.

The proposed system involves continuous transmission of ultra-high frequency radio automatic warnings within a radius of three miles.

Los Angeles stands on the site of an Indian village.

You can flatter any man by telling him he is flattery-proof.

Stanley Baldwin Suffers Loss

Says Financiers Should Be Picking Oakum Instead of Picking Pockets

How hard the trade depression has hit eminent Englishmen is revealed by the fact that Hon. Stanley Baldwin's account of his own personal losses.

Denouncing financiers who "ought

to be picking oakum instead of picking

pockets," and referring to the iron and steel industry,

he said:

"When I took office, most of what I had was in that ancient industry. Shares I now hold, and which I held then, and could have sold for

three pounds (\$15) each, today are

worth twenty pence. No cataclysm

on earth can bring them back to

more than a fraction of their ancient

value."

The single painting of "The Last Judgment" is 33 feet wide and 66 feet high. If a single one of the half-dozen marble bathtubs were put on the market it would bring enough to build a good-sized church. In the library are single manuscripts that are priceless, marble tables inlaid with pearls and gems worth a fortune. The tapestries and paintings in the Vatican, and Henry Ford would be bankrupt before he had finished if he started to purchase the treasures of this great building.—Successful Farming.

Storehouse Of Wealth

Works Of Art Of Fabulous Price In Vatican At Rome

Said to be the largest palace in the world, the Vatican contains 80 grand stairways and 200 smaller ones, 20 courts and 11,000 halls, chapel rooms and apartments, and its wealth is so fabulous as to be beyond anyone's knowledge. Within the Vatican are tens of thousands of paintings and objects many of which alone are worth a fortune. The single painting of "The Last Judgment" is 33 feet wide and 66 feet high. If a single one of the half-dozen marble bathtubs were put on the market it would bring enough to build a good-sized church. In the library are single manuscripts that are priceless, marble tables inlaid with pearls and gems worth a fortune. The tapestries and paintings in the Vatican, and Henry Ford would be bankrupt before he had finished if he started to purchase the treasures of this great building.—Successful Farming.

How To Lose Fat and Get That Youthful Feeling

Over in Great Britain when a man feels "fat as a pig" and looking the picture of health" they say, "HIS GOT THAT KRUSCHEN FEELING."

That means he takes his little dose of Kruschen Salts every morning. In Germany, Holland—in Australia. In South Africa, for Kruschen Salts are now sold the world over.

Kruschen Salts is a salt only necessary to healthy life.

Take half a teaspoon in a glass of hot water before breakfast every morning, mix with your coffee, tea, etc.

But don't miss a morning, for Kruschen not only puts and keeps the stomach, liver kidneys and bowels in a splendid healthy condition, but purifies your blood stream and renders new life and activity to every part of your body.

A Stabilizing Factor

Canadians Mining Industry Has Steady Influence In Depression

Canada's mineral industry has been the principal stabilizing factor in the business depression that engulfed the Dominion, said Hon. W. A. Gordon, federal minister of mines, in an address at Ottawa. Despite new low record prices in 1930 for most of the minerals, the industry increased production figures and, at the same time, most of the companies were able to show reasonable profits. Canada was forging to the front as one of the greatest mineral-producing countries in the world, all of which had a decided influence on its economic stability.

Speaking of the future that lay before the Canadian industry, Mr. Gordon said vast areas still were to be prospected, and many outstanding developments were not in full operation. He had no doubt that the future would be even greater for the industry than the past.

The native home of the banana is not known, though it is now raised in every tropical and subtropical country.

PAIN after eating

What many call "indigestion" is very often nothing but excess acid in the stomach. The stomach nerves have been over-stimulated, causing food sour. The corrective is an alkali, which neutralizes acids instantly. The best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard anti-acid with physicians in the 50 years since its invention. One spoonful of this harmless, tasteless alkali will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when you learn the efficiency of this modern pleasant way. A small bottle is sufficient to show its merits.

Be sure to get genuine Phillips' Milk of Magnesia prepared by physicians for more than 50 years in correcting excess acid. 50c a bottle; any drugstore. Complete directions for its many uses are enclosed with every bottle.

The Genuine Milk of Magnesia is always a liquid—never a tablet. Look for the Phillips' name on bottle.

Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc. under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh...delicious! Para-Sani keeps them from stalting. Get Para-Sani in the handy, sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Pull" Packs in sheet form.

Four Day Mail Transmission Between Canada and Britain Coming As Aviation Progresses

Four day mail transmission between Great Britain and Canada is seen by post office officials as a reasonable expectation within the next year or so, while the development of aviation may find letters from London being delivered in Vancouver within two and a half days.

Discussing the future of aerial services, P. T. Coolican, deputy postmaster-general, states that during some periods of the year at least the transference of mail from ship to plane in the Straits of Belle Isle should make it possible to land mail in New York ahead of trans-Atlantic liners entering that port from the British Isles.

While no announcement was made that the department contemplates inauguration of such a service, it was indicated considerable study had been given the project. A successful trial flight was made last fall when letters and newspapers were delivered to Premier R. E. Bennett on board the "Empress of Australia" as the vessel went through the straits. This meant a saving of two days at least in transmission. Decision of the United States government to institute trans-Atlantic air flights via Bermuda and the Azores has led to consideration of possibilities of flights over the North Atlantic steamship track between Britain and Canada. Mr. Coolican drew attention to the fact that the flight from the Irish Coast to Newfoundland is shorter than the single leg between Bermuda and the Azores of the proposed United States service. The project in the mid-Atlantic also involves overwater jumps from the coast to Bermuda and from the Azores to Lisbon. Furthermore, it was stated fog conditions along Canada's eastern coastline are probably not worse than those in the neighborhood of Bermuda.

Even with the present cruising speed of airplanes, it is calculated mail from London would reach Belle Isle in 20 hours. That would mean a service of 30 hours to Montreal, 40 hours to Winnipeg, and 50 hours to Vancouver. With aviation companies confidently predicting machines capable of a cruising speed of 140 miles an hour in a year or so, this time would be considerably reduced.

Turning to more distant communities, post office officials visualize the possibility of flights which will take Canadian airplanes from northern British Columbia into Japan, touching the United States aviation base at Unalaska in the Aleutian Islands, then following the chain formed by this group and the Kurile Islands into Tokyo.

Paid Taxes In Cabbages

German Farmer Received Last Notice and Had No Money

The sauerkraut market in the Holstein town of Heide, Germany, is badly congested because one farmer paid his taxes in cabbages instead of currency.

The farmer had been served with a "last notice to pay," whereupon he wrote to the tax collector that he had not the money, but was willing to pay in kind.

As he didn't receive a refusal, he loaded four tons of cabbages early one morning and dumped them in front of the tax office, with a note that he considered the claim settled.

Appointed To Vice-Presidency

Jack Miner, who runs the Miner bird reservation here at Kingsville, Ont., received word from Washington of his appointment to the vice-presidency of the American Forestry Association which has several hundred thousand members. George D. Pratt is the president.

An orator is a gentleman whose voice carries farther than his opinions.

One of the hardest things to get in the winter is up in the morning.

"I am sorry for you, old fellow."
"Why?"
"I bought my wife a fur coat, and she is telling your wife all about it."
—Buen Humor, Madrid.

W. N. U. 1874

Self-Government For India

Premier Ramsay MacDonald Speaks Of British Policy Of Freedom

In an address broadcast to the British Isles, India and North America, Premier Ramsay MacDonald traced the steps in India's march toward the goal of self-government which he said, "for half a century responsible British statesmen have been assuring India was the purpose of our presence there."

The premier said the conference had not been called because of recent incidents in India or because British government or Indian officials were showing weakness.

"These incidents rather have placed obstacles in our way," he said.

"Events have moved fast in India during the last few years," Mr. MacDonald said, "and it is unfortunate that a good deal of enthusiasm has been impatient and overflowed the bounds of wise political activity. If we are to be turned away from our policy of freedom and justice because of destruction, it would mean that we would have to abandon the only way to settlement and order."

The premier added that unless Great Britain had intended eventually to permit India to have self-government, it should have seen that the effects of education of young Indians were piling up trouble for the government.

(By Eva A. Tingey.)

LOVELINESS ITSELF!

All Tingey models are created and sketched by Eva A. Tingey, the patterns are made in New York. Nothing could be more luxuriously lovely than this sleekly dattering evening dress. It is feminine and graceful, a degree.

It is carried out in transparent velvet in striking indelible blue—has its flounced ruffl and full-shaped skirt. Most popular evening dresses of this type are to be seen this season.

Just as easily could the dress be carried out in lace, a very modest medium, or in almost any other soft fabric, such as crepe satin, chiffon, triple georgette or sheer metal lame, etc.

The slim girdle is of soft tissue and plied edges, and the edges can be plucked or fished back.

This pattern may be obtained in sizes 16 to 20 and 36 to 40. It is ready for immediate delivery. It is \$2.50.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Production Of Milk

Milk Production High In Saskatchewan During Month Of December

"Never do I remember the production of so much milk in the month of December of any year as there was recorded in December, 1930," O. W. Anderson, president of the Saskatchewan Co-Operative Creameries, said recently.

"The increase in production has pretty well settled the butter situation for the first time, since the announcement from New Zealand last fall. The new year is starting out better in the dairy business than the old year did," Mr. Anderson remarked.

Bankruptcy Laws Modified

Are Far Less Severe Now In Scotland and England

The laws of bankruptcy are far less severe on debtors than they used to be. At one time in Scotland bankrupts were compelled to wear a distinctive costume, and in England, until 1861, they were treated almost as criminals. So degraded was bankruptcy in general esteem that newspapers and magazines with pretensions to refinement, hesitated to print the word in full and when they had to use it, say in publishing a list of unfortunate compelled to file a petition, they did so under the heading "B-k-pts."

Heavy Poultry Shipments

Prairie Provinces Enjoyed Good Trade During the Holiday Season

The Prairie Provinces furnished a large quota of the recent festive season's poultry supplies. Some 177,000 dressed poultry, making a total of 1,750,000 pounds, were shipped over the Canadian Pacific lines between December 3rd and 20th, inclusive. There were 30 carloads from Manitoba, 22 from Saskatchewan, and 16 from Alberta.

Japan is trying to stabilize the price of silk cocoons.

Bright Outlook For Canada

Optimism Expressed In Address of Sir John Aird

Optimism in the future of Canada was the keynote of an address delivered at Toronto before charter stenographic reporters' association of Ontario, by Sir John Aird, president of the Canadian Bank of Commerce.

Every confidence the Dominion would survive the present economic depression with greater force than ever before, was expressed by Sir John.

With the help of British capital, he proceeded, Canada would exceed the United States and ever be free of domination. The speaker also hoped with the readjustment of British war debts and reparations, British capital would once again flow into the Dominion.

"I do not think it is possible for Canada to have a serious panic," Sir John declared. "In 1914, the government passed the 'Finance Act' which enabled Canadian banks to borrow as much money from the government as they desired, providing they got security. I think it is one of the best on the statute books."

Canada, in the future, will be the bread basket of the United States, the speaker predicted. The United States has devastated her lands, he declared, while the Dominion has developed a good diversified farming.

A New Brain Food

Given In Large Doses Sodium Bromide Has Good Effect

Sodium bromide, which looks and tastes like table salt, is the newest brain food.

This is a surprise in the scientific world because sodium bromide has been known for mildly depressant or sedative effects. It was given in small amounts, three to five grains.

But when tried in massive doses of 50 to 200 grains at a time upon mental patients at the Utica, N.Y., state hospital, it produced marked improvement.

The psychologists conclude that bromide's effects on the mentally diseased are associated to a large extent with speeding up of brain functions and to some extent with improved motor co-ordination.

These are group effects, that is, not all individuals were affected in the same manner.

Solvents Have New Law

Killing One of Your Own Pigs Can Be Made Quite a Worthwhile Venture in the Soviet Union

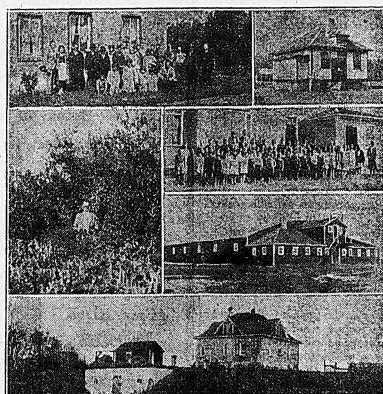

It might, for instance, be worth two years' imprisonment or exile. Livestock isn't increasing at the rate the government would like, so the powerful Central Executive Committee has placed a ban on killing any livestock capable of producing dung.

Nancy—"This morning while I was practising my husband threw a bucket of him for a biscuit I made for him myself."

Sally—"The big brute. It might have killed you."

Many a man has a kick coming that never reaches him.

Winning Saskatchewan Communities in C.N.R. Progress Contests

Announcement of the results of the first year of the Canadian National Railways' community progress competitions for European settlements in Saskatchewan shows Edenwald, German settlement near Regina, won first place; Laird Mennonite community near Saskatoon, second; Bokewar Ukrainian community near Kipling, and Calder Ukrainian settlement near Yorkton, third. Pictures above show, left to right: (1) Judges visiting Louis Bokewar's farm home in Bokewar; (2) Snow-bird school in Laird district; (3) Aff orchard scene on the farm of H. H. Funk in Laird district; (4) School at Calder; (5) Agricultural Hall in Edenwald; (6) Farm home of W. Winkler in Edenwald.

Hinterland Of Alberta, The Farthest North Part of Canada, Is Mapped From The Air

In striving to comply with the insistent demand for accurate maps, geographers and mappers now have the aid of the aeroplane plus photographic equipment. By this means 4,870 square miles in the extreme northeast corner of Alberta, in the same latitude as Lemongrad, Russia, has been mapped, in the Exploratory Edition of the Fitzgerald sheet of the National Topographic Series.

A new map, which on a scale of four miles to the inch, is obtainable upon application to the Surveyor-General, Ottawa, for the sum of twenty-five cents in sheet form, or for fifty cents, if on lined back or folder cover.

A portion of Lake Athabasca occupies the north-eastern corner. In the fur-trading days this lake was about 70 days canoe travel from Fort William, the old capital of the North-West Company. Now the aviator-surveyor takes only as many hours to make the trip, including time for refuelling. By train and steamer seven days are required for this journey.

Slave River, connecting Lake Athabasca and Great Slave Lake, divides the Fitzgerald area into two distinct classes of country. To the west is an almost level plain with few lakes but many sloughs and hay meadows grazed by salty plains, in some cases grass-covered or, with growths of young poplar. This is a natural range country. Horses and cattle from Fitzgerald and Fort Smith graze over it all the year round, and come out in the spring in splendid condition.

Here, too, is the last remnant of the wood bison. In the past few years bison from Buffalo National Park at Wainwright, Alberta, have been brought in and, together with the wood bison, are increasing rapidly.

All of the mapped territory east of the Slave River forms part of the great PreCambrian shield, displaying rocky ridges and knobs with netted lakes between them. Along the river on this side is a fringe of large spruce with jackpine on the ridges, and spruce, tamarack and birch in the hollows. Here is fair trapping ground into which hunters from Fitzgerald and Fort Smith penetrate.

Lake trout and whitefish are plentiful in contrast to the jackfish and suckers which frequent the waters of the Soviet Union. It might, for instance, be worth two years' imprisonment or exile. Livestock isn't increasing at the rate the government would like, so the powerful Central Executive Committee has placed a ban on killing any livestock capable of producing dung.

Commenting on the timber along the Slave, Surveyor William Ogilvie, F.R.G.S., of Yukon fame, said that there was abundance of underbrush, alder, willow and hazel, including alders more than eight inches in diameter and 30 feet high, while willows were often a foot in diameter. Poplar exceeded 12 to 15 inches in diameter and grew from 100 to 120 feet high. In addition to the lumber obtainable from spruce, there is a supply of timber in this northern region for fences, buildings and fuel.

At Fitzgerald there are trading stores, warehouses, dwellings, a post office and a mission church. Here freight from the steamers is unloaded and re-loaded on trucks for the portage road to Fort Smith. Government administration buildings are located at the latter, with a mission school, church, stores, post office, wireless station and depot of the Royal Canadian Mounted Police. Both Fitzgerald and Fort Smith have a weekly mail from about April to November.

At the west side of the Slave River is about a mile and a half wide. On the west side of the Slave River, opposite La Butte, about 34 miles in an air-line south of Fitzgerald, cuttings occur of about 10 feet of gypsum, overlaid by 20 feet of broken limestone. Between this and Fitzgerald are several other outcrops of gypsum on islands. The upper beds of these sections are used locally for making lime.

Southwest of Fitzgerald on the Slave River another deposit of 20 feet of gypsum is found overlaid by about 10 feet of dolomitic limestone. This escarpment extends northwestward for about 40 miles to the Little Buffalo River on the Peace River map. The top of the escarpment is broken and pitted with sink holes in a way characteristic of a gypsum region.

Varied and rich are the flowers of

the Fitzgerald country. Added to these are the blossoms of small fruits such as high bush cranberry, cherries, strawberries, wild currants, gooseberries, blueberries and raspberries. Wild fowl, fur-bearers and bigger game people the lakes, woods, and open wilds.

Market In France For Wheat

Expect That Imports For This Year Will Be Around 20 Million Bushels

The proposal on the part of the French government to fix the price of wheat in France at around \$2 a bushel would have no direct effect on exportation of Canadian wheat to that country. This was explained by people in close touch with the situation.

The object of the French government is to provide a price that will be profitable for the domestic growers of wheat. It is contended that \$2 wheat is necessary to encourage production in France. Should this price be fixed, the tariff imposed by France would be approximately equal to the difference between world prices and the French fixed price. The duty would be raised or lowered as world prices fell or advanced. The French government has authority to change its tariff in such situations by methods somewhat similar to orders-in-council in Canada.

The millers of France have estimated that it will be necessary to import from 25 million to 40 million bushels this year.

France has agreed with Canada to buy from seven and a half million bushels to nine and a half million bushels of Canadian wheat each year. This undertaking is the first of its kind. It was arrived at as approximately two-thirds of the average importation from Canada during the past three years. A spread of two million bushels in the undertaking was made to take care of the varied requirements from year to year.

While the French government guarantees to take seven and a half million bushels, it is explained that this is the minimum. In the crop year of 1929, she bought 18 million bushels of Canadian wheat, and with France's requirements even greater this year than they were then, the impression is that her imports this year from Canada will be at least around 20 million.

Preventive Measures

Forty Thousand Lives Saved Every Year In Britain Through Increased Knowledge

Every year in Britain 40,000 lives are saved that would have been lost a generation ago, declares Sir George Newman, chief medical officer of the board of education, in his new report on the health of school children. Nevertheless the rate of disease and disability among boys and girls of school age remains static. The population is being maintained by the enormous advance of preventive medicine and enlightened motherhood. These two factors offset the decline in birthrate. Sir George asks for a complete school dental service.

Soybeans In Canada

One ton of soybeans yields approximately 240 pounds of oil. In addition the resulting cake or meal has a high value for feeding cattle. This plant is chiefly cultivated in southwestern Ontario, and it is grown in all provinces and its production is increasing.

The Ubiquitous Canadian Strawberry. The strawberry is found wild in Canada from the Atlantic to the Pacific, its range extending from the international boundary as far north as the 6th parallel, which is less than three degrees from the Arctic circle.

"You can't imagine how difficult it is to write on paper with a pen!"
"That's nothing." For six months I have been writing on the furniture with a nail!"—Pages Gates, Yverdon.

Daily Mishaps

**HATE ZAM-BUK
A DAILY NEED**

ZAM-BUK is a pure local salve known all over the world for its wonderful soothing and healing properties. It quickly stops pain and irritation, relieves inflammation and grows new hair. ZAM-BUK is equally good for eczema, rashes and piles as for the daily mishaps such as burns, scalds, cuts, boils or cold sores. A sample free and postpaid will be sent on application to Zam-Buk Co., Toronto.

5th Ave. 2 for \$2.50 all郵

have been a user of Zam-Buk for many years. During that time I have used it for cuts, bruises, chapped hands, skin troubles and rheumatism. It has always given great satisfaction and relief, and is a great pain killer. My personal opinion is that it is one of the best Ointments on the market.

Is Cancer Caused By Cooked Food

Free Use Of Raw Fruits and Vegetables Is Recommended

(By Dr. Julian P. Thomas.)

Some forty years ago, then a professor of skin diseases in a southern medical college, I made some startling discoveries which enabled me to kill external cancer. Like many doctors making a specialty of cancer and other such troubles, I finally developed what was believed to be cancer in the stomach; and as I knew that there was no ordinary way to remove such a condition I began to use natural, uncooked foods such as fruits, nuts, fresh vegetables, etc., which apparently eradicated the trouble entirely. Many people heard of this strange experiment and, since then, many thousands of others have been benefited by my experience.

Today, deaths from cancers are increasing so fast that every man, woman and child is in danger, so that the discoveries I made years ago become of great importance. All you have to do is to escape death from other causes long enough, and cancer is almost sure to get you. In fact, cancer and the sickness of premature old age are very closely connected. For as long as the tissues can be kept young and healthy, cancer cannot develop in or part, because the body in general, or in part, becomes lowered in vitality, then look out.

Women are more prone to cancer than men, for it is said that 1 out of every 8 women, and 1 out of every 12 men, who reach the age of 40, develop cancer.

B.C. Coal

Oven Tests For B.C. Coal To Be Made At Winnipeg

Arrangements for oven tests of British Columbia coal by the Winnipeg Electric Company have been completed by Hon. W. A. Gordon, Dominion Minister of Mines, it is announced by Edward Anderson, K.C., president of the Winnipeg firm. The arrangement is in accordance with the policy of the Department of Mines, to investigate and test the various coals of the western provinces to determine their suitability for various purposes.

(By Eva A. Tingey.)

SMARTLY RUSSIAN

All Tingey models are created and sketched in Paris and the patterns are made in New York.

A fascinating little dress is this, and one which had many points and curves quite similar to the bikini! It has trim of eggshell silk piping which is so attractive against a dark ground, as was the case in the original model of vine red tweed. Such materials as supple velvetine, chiffon velvet, marcasin, wool crepe, wool jersey and canton crepe, etc., were studied for the dress. Imagine for instance how soft and supple velvet with erci or ocre lace would be, or black canton crepe with parchment tinted collar and cuffs. With these of course the outfit could be straw or a modern design in enamel metal, etc. The peplum frill cut "en forme" not too full, with a waistline at low natural position can be quite slimming to the hips.

This pattern may be obtained in sizes 14 to 20 and 34 to 40. It is ready for immediate delivery. It is cut in two pieces.

Send 25 cents (in stamp or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Stinking Smut

By H. G. L. Strange, Director, Research Department, Sealeh Grain Co., Ltd., Winnipeg, Man.

Smut causes the farmer serious losses. Grain that even slightly smells of smut suffers a deduction of from 6 to 8 cents a bushel, some years more, and a much greater loss is caused by smut because of the plants that are destroyed in the field.

Crops clean from smut can easily be grown and these serious losses avoided.

A little time and care—a very little money, is all that is required.

The following methods, if carefully followed, should ensure a crop free from smutting smut.

1. If grain is unmistakably smutty it should not be used for seed if can possibly be avoided. It will be found to be far better to dispose of the smutty grain and to purchase new seed that is free from smut. (Good pure pedigree seed never costs so cheap as it is at the present time.)

2. Should the seed be free from smut and from smut balls then either Formalin or Copper Carbonate can be used for treating wheat, but Formalin only should be used for oats and barley.

3. Copper carbonate cannot harm the germination of the wheat, and seed can be treated during the winter or at any time before seeding, but Copper Carbonate costs more than Formalin and should too much be used, then sometimes when the air is damp the feeding gears on the seed drill may become clogged up and the gear rods may twist and break.

Approximately two ounces, by weight, of Copper Carbonate to each bushel of wheat is the amount, but it must be very thoroughly mixed so that each kernel of seed is uniformly coated with proper Copper Carbonate. Treatment Machine is the best method of mixing.

Wheat treated with Copper Carbonate properly in this manner can be expected to produce a crop free from smut provided the seed treated was practically free from smut and quite free from smut balls.

4. Formalin is cheaper than Copper Carbonate but it must be used only a few hours before the grain is seeded, and most important of all it must be used of exactly the right strength, no more, no less. Both the Formalin and the water must be measured accurately so as to obtain this exact strength.

Should the solution be even a little too weak, then the smut spores are not all destroyed. Should the solution be a little too strong, then some of the germinating power of the seed will certainly be harmed and so, bushels to the acre will be lost in the field.

The correct strength to use is one Imperial pint of Formalin to 40 Imperial gallons of water, or one pound of Formalin to 30 Imperial gallons of water is the same proportion.

Most farmers use pails for treating seed with formalin. Most pails hold either 12, 14 or 16 quarts.

For the 12 quart size one and one half ounces, by measure, of Formalin should be used.

For the 14 quart size one and three quarter ounces, should be used.

The 16 quart pail should receive two ounces of Formalin.

The size of the bucket can easily be determined by weighing. The water in a 12 quart bucket weighs 30 pounds. In a 14 quart bucket 35 pounds, and in a 16 quart bucket 40 pounds.

Note carefully that the ounces mentioned for Formalin are ounces by measure and not ounces by weight. There are twenty fluid ounces by measure in one Imperial pint.

To measure Formalin accurately a two or three ounce bottle or graduating measure or bottle marked with ounces and parts of ounces, can be purchased for a few cents from any drug store, or it is possible that a proper metal measuring cup may be obtained free from those selling Formalin.

5. The Formalin sprinkle method is the one usually used by farmers. It is quick and efficient if care is taken.

Put about 25 bushels, or less of grain in the front end of a clean wagon box, which is slightly tilted to the rear.

Throw on the grain a bucket of two of the correct solution of Formalin and water and shovel the grain over and over so as to mix the solution and shovel over again until the grain is uniformly moistened. This will take about a gallon of solution to each bushel of grain.

By placing a boiler or bucket on the ground at the end of the wagon

Canadian breeder of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Royal Bank Annual Meeting

At the annual meeting of the Royal Bank of Canada, the President, Sir Herbert Holt, referred to the development of the Canadian livestock industry has not kept pace with our grain production and we are actually importing large amounts of butter and meat. In the meantime our exports of live products have steadily decreased.

It is evident that while the results of the Imperial Conference are naturally disappointing to the overseas Dominions, it was too much to expect that a ready-made proposal would be adopted.

It is evident that while the results of the Imperial Conference are naturally disappointing to the overseas Dominions, it was too much to expect that a ready-made proposal would be adopted.

Explanations and Comments

The cure of Peter's Wife's Mother, 4:32-35. Let us consider the sympathetic manner in which the Canadian chartered banks have taken care of their members. They appealed to Jesus for help, and not in vain, for He stood over her and rebuked the fever, and she was so completely restored to health and comforted and healed to them.

The Cure of All Sorts and Conditions of Aliments, 4:40, 41.—The fame of Jesus spread, and friends of the sick brought cases to him, and he was greatly alarmed over the great fever which had broken out in Capernaum. The people were dying of it, and Jesus, after a difficult day, as clearly demonstrating that the Canadian banking system is adequate to the needs of the country, times of stress as well as under normal conditions.

He worked in atmosphere of sympathy and faith. When He found Himself in an atmosphere of uneasiness, He comforted the sick, and added: "Do not be afraid, it is I; have no fear."—Matthew 8:12. The cure of the leper, 8:2-4.—When Jesus went away to a lonely place for prayer (Mark 1:35), but the multitudes followed Him, and sought to prevent His leaving them. "I must preach the good tidings of the Kingdom of God to the other cities also," He declared, and therefore He did not yield to the demands upon His healing power presented a real temptation to Jesus?

The claim that He is the only man in the world in his particular line of work is made by Herr Hugo Breuer. He supplied English doctors with Russian skulls. "There is already demand for Russian skulls in good condition," Herr Breuer said.

"Because of the hard fare on which Russian peasants live their teeth are in very good condition, and the skulls are therefore invaluable for dental demonstrations. My firm collects the skulls in Russia, and it is my job to sell them to doctors. A good skull brings in about \$90.

A test made by government scientists showed that 7,000 pounds of oil dumped from oil burning ships in the high seas would drift 80 miles and cover the water to the extent of 300 square miles.

Preaching and Healing In Galilee, 4:42-44.—When day came, Jesus went away to a lonely place for prayer (Mark 1:35), but the multitudes followed Him, and sought to prevent His leaving them. "I must preach the good tidings of the Kingdom of God to the other cities also," He declared, and therefore He did not yield to the demands upon His healing power presented a real temptation to Jesus?

The Cure of a Leper, 5:12-16.—On the Sabbath Jesus came and falling on his face before Jesus in reverence, cried, "Lord, if Thou wilt, Thou canst make me clean." With infinite compassion Jesus said, "I will; be thou made clean" and immediately the leprosy left him.

In a recent month Spain exported nearly 20,000,000 pounds of olive oil.

MODERATION IS ADVICE GIVEN BY BROWNEE

Calgary, Alta.—Warning against hasty steps to embrace Sovietism, secession, or currency alteration, was delivered by Premier J. E. Browne in annual session. The U.F.A. party leader counseled ample deliberation of any steps urged by radical forces rising out of unrest, and a revival of the old crusading spirit" of the farmer.

"Governments in Canada cannot allow agriculture to be destroyed," reminded Mr. Browne. "Canada cannot live unless agriculture does." He advised agrarians, however, to "consider whether it is worth while to continue farming, and how." It requires only a small reduction of acreage and a correspondingly small increase of world consumption to wipe out the bughorn of overproduction, he said.

"What about secession?" asked the premier. "The difficulty in the West is that we have too much wheat. Would you sell it under secession? Where? And what would you sell it for?" He stated that in some parts of the province propagandists are urging all the good things in the Russian system, and he questioned that their advice should be followed. He told his audience they could have in Alberta anything that is had in Russia, if they deemed it best, "by the simple expedient of your votes."

"Don't think that by some change in Canada's financial policy—currency—we can in one year pass from bad times to good times," warned Mr. Browne. He did not wish to suggest that he was satisfied with the Canadian financial system, he said, and was not sure that those who are in a position to be trustees for depositors are the best to handle credit.

Creditors pressing for collection would be one of the country's most acute problems if Canada should have 70 to 75-cent wheat next year, Mr. Browne believed. He foresees the need of organized effort to solve this difficulty and to work out a scheme regarding tax arrears to keep farmers on the land.

The government of Alberta is apprehensive of a crash in livestock prices next year, if over-production follows efforts toward mixed farming, Mr. Browne averred. He mentioned that he had immediately offered co-operation with the plan of F. W. Beatty, K.C., for a loan fund for aiding livestock purchase, though he did not agree with some aspects of the plan.

If the prairie premiers' proposal for a fixed price for wheat sufficient to prevent loss, but not large enough to increase production, had been accepted by the Dominion government, Mr. Browne believed, agriculture would have been saved at a cost probably not larger than expenditures already authorized for relief.

Would Ban Beer Parlors

U.F.A. Want All Beer Parlors Abolished In Alberta

Calgary, Alta.—Immediate action to abolish Alberta's beer parlors, either by legislation or by plebiscite, was urged in a resolution passed at the annual convention of United Farmers of Alberta. Both the U.F.A. and the women's section of the organization had previously condemned beer parlors and sought a plebiscite.

The stand of the convention endorsed the request of the Alberta Prohibition Association for abolition of beer parlors, and labelled beer halls as a menace to the social and economic life of the province. "The time has come," stated Norman Prestley, newly elected U.F.A. vice-president, "to strike another body blow at this traffic."

Planetoid Approaches Earth

Toronto, Ont.—Eros, a planetoid which comes near the earth approximately every 30 years, is due to make its second appearance, since its discovery in 1898, on the 29th or 30th of this month. Its visit will afford one of the most outstanding opportunities for astronomical research that has occurred since the beginning of the century, Prof. H. R. Kingston, head of the department of mathematics and astronomy, Western University, says.

Sentenced By Court Martial

Devonport, England.—A naval court martial sentenced Able Seaman Benjamin Towl to six months' hard labor and dishonorable discharge from the service in connection with the short-lived trouble aboard the submarine depot ship "Lucia" recently. He was the second enlisted man to be tried. Thirty men were involved.

Special Flag May Be Used

Rumor Says New Governor-General Will Fly Own Flag

Ottawa, Ont.—While official announcement is lacking, it is rumored here that with the approval of the King the next Governor-General of Canada will fly his own flag, as personal representative of His Majesty. At present the only flag officially recognized in Canada is the Union Jack.

Cape Town, South Africa.—South Africa already flies its own national flag alongside the Union Jack, and now the governor-general is to have his own flag as the personal representative of His Majesty.

The new governor-general is the Earl of Clarendon, and his flag will consist of a blue ground on which is the royal crest in gold, with the words "Union of South Africa" above the crest and the same words in Dutch below it.

His Majesty has given approval for the use of the flag.

CANADA WHEAT SURPLUS DATA IS REVEALED

Ottawa, Ont.—Wheat surpluses in exporting countries of the world are reviewed in a statement handed out by the Dominion Bureau of Statistics recently. Canada's surplus is given at 263,000,000 bushels. Other important exporting countries having surpluses which are estimated as follows: Argentina, 200,000,000 bushels; Australia, 165,000,000 bushels; United States, 241,000,000 bushels. The surplus in Russia is not known, according to the statement, but it has been estimated that 1,157,400,000 bushels have been harvested.

The figures given reflect the situation during the month of December as far as foreign statistics are concerned, while the situation in Canada is covered up to the middle of January.

"Surveying world situation from a Canadian viewpoint, no marked increase in demand is visible," the review states. "European countries, apart from France, will not increase their imports to any great extent. It will be remembered, however, that France has undertaken that between seven and nine million bushels of wheat will be imported during the season. From August 1 to December 31 last, the Canadian exports to France amounted to 3,739,277 bushels.

"Germany's policy with regard to imports of foreign wheat is identical with that of France, the endeavor being to force consumption of rye as bread and as a mixture with wheat. The net result in these two countries is that native wheat is selling at prices from \$1.67 to \$1.87 per bushel, while good North American wheat cannot be imported at the very low price of 67 to 70 cents per bushel."

It is stated in the review that the Argentine surplus will have to be disposed of as soon as possible account of inadequate storage facilities. At the present time in certain weather in the Argentine is hindering large exports and also deteriorating qualities. Inadequate storage facilities are also the case in Australia which will result in the country selling in the open world market. Australia, however, is also experiencing inclement weather. With respect to Australia, a new outlet has been found in India which is taking large imports from the Antipodes.

With respect to the United States it is stated that that country is not at present a competitor in world markets in spite of large wheat stocks. Russia has forwarded 72,208,000 bushels through Black Sea ports since August 1, but recent export shipments have fallen off. It is forecasted, however, that increased shipments will be forthcoming during the winter.

Non-European countries are expanding their wheat imports, according to the review and continued dry weather in India should mean a better demand for wheat in these countries. The Orient is looked upon as an outlet for Canadian wheat.

The opinion is expressed that with seven months of the crop year remaining, the surplus of 233,000,000 bushels in Canada is not unreasonably high. Attention is drawn to the fact that the five year average export for the seven months ending July 31, was 141,115,554 bushels or 20,169,365 bushels per month. There has been a continued improvement in the exports of wheat and wheat flour during the first five months of the crop year.

Two-thirds of the railways in Switzerland have been electrified.

No Official Calls In Cuba

Change Necessary In Program For Prince Of Wales

Havana.—The Prince of Wales and Prince George, who are making an 18,000-mile tour of Spanish America in behalf of British trade, will not leave their ship when it reaches Havana, January 31.

The British legation has informed President Machado that because of the shortness of time available here and the court mourning for Princess Louise, a change in program had been necessitated which would prevent their paying any official calls in Cuba. Delegates from their ship, the "Oropesa," which left Vigo, Spain, yesterday morning, say the prince is enjoying their trip and participating in the ship's life with other passengers. The "Oropesa's" first stop is at Hamilton, Bermuda.

To Protect Dairy Industry

Empire Council To Be Formed With Headquarters In London, England

London, England.—An empire dairy council with headquarters in London, England, will be formed according to a decision made by the Royal Empress Society.

The main objects of the council will be to co-ordinate the interests of the dairy industry throughout the empire, to take steps to protect the home and overseas empire producers from unfair foreign competition and to deal with immediate and urgent questions affecting butter and cheese.

U. F. A. OFFERS PLAN TO ASSIST THE PRODUCER

Calgary, Alberta.—Request that Canada's government take over the 1930 wheat crop, paying producers in wheat certificates, was entered at the annual convention of United Farmers of Alberta. The certificates, it was proposed, would be redeemable in wheat and receivable in payment of taxes.

Payment in certificates of a price to producers approximating cost of production, was advised in the resolution advanced by George Bevington, of Winterburn, agrarian authority on finance. Actually, explained Mr. Bevington, the wheat certificates would be read "trade dollars," not necessarily based on redemption on wheat, but good outside Canada for any commodity produced in the Dominion.

William Irvine, M.P. for Wetaskiwin, associated himself with Mr. Bevington in the resolution, which was approved unanimously by the delegates representing more than 16,000 Alberta farmers. Other important resolutions sought an early parity of wheat exporting countries to seek stabilized wheat production and export prices, and a packers' and livestock men's meet to gain an agreement with Britain for regular monthly minimum shipment of live-stock and dairy products.

The proposals were contained in a lengthy memorandum from the U.F.A. board of directors, entirely after a full day of debate. The document, as supported by the convention, asked tax and interest reduction, farm relief, credit reform, market extension and tariff revision.

WILL VISIT OTTAWA

Photograph above shows Miss Joan Pearson (left), and her cousin, Hon. Nancy Pearson, well known beauties of English society, who will pay a visit to Ottawa during present world-tour. Attended by their grandmother, Viscountess Cowdray, they recently visited Los Angeles and will include New Orleans and Palm Beach in their travels.

MAY COME TO CANADA

Earl of Cromer, who, as Lord Chamberlain, assumed Maro Connell's "The Green Pastures," from English stage, is being persistently mentioned as possible successor to Lord Willingdon as governor-general of Canada.

British Policy In India

People of India Disposed To Judge New Constitution On Merits

Calcutta, India.—Referring to Prime Minister Ramsay MacDonald's statement at the close of the Indian Conference in London, England, the newspaper "Liberty," which represents some sections of the National Congress, admitted there were passages which revealed the anxiety of the British government to introduce some elements of popular responsibility in the Indian administration:

The newspaper, of which Subhas Chandra Bose is at present serving a prison sentence for his activities on behalf of the Nationalists.

Subhas Chandra Bose is at present serving a prison sentence for his activities on behalf of the Nationalists.

Russian Wheat Imports

British Government Holding An Investigation On Question

London, England.—The House of Commons witnessed a brief outburst over the question of imports of wheat from Russia.

In reply to a questioner, Rt. Hon. Christopher Addison, minister of agriculture, said the British government was examining the question of importation of wheat from Russia and its effect on British agriculture. He was unable to say, however, when the British government would issue a statement of the outcome of its inquiry.

Western Exhibition Officers

Winnipeg, Man.—N. W. Kerr, K.G., Brandon, Man., was elected president of the Western Canadian Association of Exhibitors at the closing session of the annual convention here. C. M. Baker, Calgary, was named vice-president, and S. W. Johns, Saskatoon, secretary-treasurer.

Gibraltar.—The British battle cruisers, "Renown" and "Tiger," have been placed under quarantine because of an outbreak of influenza among their crews.

Hail Insurance Losses Heavier Last Year Report States Many Companies In Alberta Forced To Withdraw

Toronto, Ont.—Canadian hail insurance losses were heavier last year than in 1929, but not so heavy as in 1927 and 1928, it was stated here by delegates to the Canadian Hail Insurance Companies' convention.

Several losses in Alberta had caused the withdrawal of many companies from Alberta, delegates said, and unless certain legislation sought by the companies was enacted, many more Alberta companies would be forced to withdraw.

Building New Roads

United States To Spend Huge Sum This Year On Extensive Program

New York.—New roads long enough to circle the globe will be built in the United States by the straining muscle of some 300,000 workers this year at a cost not far short of a billion dollars.

Upwards of 9,000 miles of the approximately 25,000-mile total will be hard surfaced. This is exclusive of 11 states in which highway commissioners could make no mileage estimates.

Winnipeg May Have More Representatives

Increase Of Two Seats In Provincial House Contemplated

Winnipeg, Man.—Increase in Winnipeg's representation in the provincial government to 12 seats is contemplated by the Bracken administration, it has been learned in authoritative circles. At present the city has ten seats in the legislature at the basis of proportional representation.

The government, it is stated, plans to bring the suburbs of St. James and Kildonan within the city representation, adding two seats.

ADVERSE VOTE DOES NOT END LABOR PARTY

London, England.—Amid the echoes of age-old religious controversies struck from behind its own ranks—struck from behind—its own ranks—struck from behind—the MacDonald Government was defeated in the House of Commons by a vote of 282 to 249. As the position of the tellers at the clerk's table told the story of the reverse on a clause of the Education Bill the House was plunged into a commotion with the Conservatives shouting: "Resign, resign."

But although the defeat came in the report stage of its own education bill there was no question of a government resignation. Prime Minister Ramsay MacDonald held the vote did not involve a question of principle. The government would, said, accept the decision of the House and would proceed with the bill.

At this juncture, Rt. Hon. Winston Churchill, who is sometimes termed the Arch-Conservative, arose to proclaim in scornful accents that Mr. MacDonald was "the greatest living master of falling without hurting himself." The government had been defeated by more than 30 votes yet the prime minister, said Mr. Churchill, had airy announced he intended to go ahead as though nothing had happened.

The Conservatives then attempted to press their advantage by moving the adjournment of the House. But here the Laborites who voted against the government on the education clause intimated that, were the motion pressed, they would again give the government their support. Thereupon the motion to adjourn was dropped and the House proceeded ed with the bill.

A few hours later the amended bill was passed by a vote of 256 against 238, and now it goes on to the House of Lords.

The defeat of the government came on an amendment moved by John Scarr, Roman Catholic Laborite from Mile End.

The English elementary schools are administered under the dual system of state-owned, or provided schools, and religious, or non-provided schools. The religious schools constitute about two-fifths of the whole and are, in the main, owned by the Church of England. The Roman Catholic schools come next in number.

All the schools are state-supported but in cases of the non-provided school, the buildings and property of a religious community are concerned.

FRENCH CABINET RESIGNS OVER WHEAT PRICES

Paris, France.—The French Chamber of Deputies overthrew the government of Premier Theodore Steeg, thereby serving notice that France is not going to pay \$2 a bushel for wheat when it is selling for 80 cents in Chicago and around 60 in Winnipeg.

The cabinet fell by a vote of 293 against 233, after an existence of five and one-half weeks, and straightforwardly prepared its resignation to submission to President Gaston Doumergue.

A government plan to stabilize the price of wheat at \$2 a bushel started the fireworks. When the opposition began gunning for Victor Boret, the minister of agriculture, Premier Steeg stated the life of his entire government in defense and lost by the narrow margin of ten ballots after scores of petitions were submitted for the Premier's removal.

The climax came with a vivid talk by Pierre Etienne Flandin, who was minister of commerce in the former government of Andre Tardieu.

Flandin painted a dramatic picture of the high price of wheat and bread in Paris, while the commodity is practically going begging in Canada and the United States. This appeared to make a deep impression on the deputies representing cities, so the government which began on December 13 was knocked out on January 22.

The attack was principally against M. Boret, who as minister of agriculture, was responsible for the price-fixing plan.

Boret offered to leave the cabinet if that would help matters. But the group finally decided to face the interpellation as a whole and the premier's show of astoundment parliament, as he was regarded the mildest of politicians.

In Steeg's tenure of a little over a month he received only one vote of confidence. That came on December 19, when he made his ministerial declaration.

Realism Causes Riot

Locomotive On Movie Screen Stamps Pedestrians

Groevesti, Romania.—The introduction of motion pictures into this village caused a stampede in which 12 persons were trampled, some of them being seriously injured.

A peasant audience, no member of which ever had seen a movie before, was assembled in the hall to view a cinematic thriller, and suddenly the scene flashed to a locomotive roaring straight down the track.

The engine appeared to rush out from the screen into the hall and the sight of this giant monster seemingly coming to run them down was too much for the spectators. They all made a wild rush for the door and in the ensuing frenzy all fittings of the building were wrecked.

Canadian Trade Decreased

Unfavorable Balance Shown For Twelve Months Ending December, 1930

Ottawa, Ont.—Canada had an unfavorable balance of trade of \$103,109,126 for the twelve months ending December 31, 1930, according to figures compiled by the Dominion Bureau of Statistics.

There was a falling off in both exports and imports during 1930 as compared with 1929. Imports amounted to \$1,008,479,479, compared with \$1,298,992,692 in 1929. Exports of Canadian goods amounted to \$858,906,366 as compared with \$1,182,412,313 in 1929, and exports of foreign goods to \$19,463,887 compared with \$25,926,117 in 1929.

World's Poultry Congress

Ottawa, Ont.—Word has just been received here of the appointment of F. C. Elford, Dominion poultry husbandman and past president of the World's Poultry Science Association.

As a member of the executive named by the government of Italy to carry out arrangements for the fifth world's poultry congress, which is to be held in Rome in 1933.

Report Cramers Refuses Post

London, England.—It was reported unofficially that the Earl of Cramers, Rowland Thomas Baring, had been offered and had refused to accept the governorship of Canada. The report was apparently from a reliable source. Lord Cramers has been Lord Chamberlain since 1922.

No Official Date

Ottawa, Ont.—Rumors in the capital are that parliament will open during the middle week of March. No official announcement however, has been made.

Canada Keeps Eye On North

Explorers and Police Make Regular Trips To Remotest Outposts

The recent acknowledgment by Norway of Canada's sovereignty of the Sverdrup group of islands in the farthest north removes the last possible ground of dispute as to Canada's title to everything north of the circle, excepting only Greenland and Alaska. This vast island empire is being consolidated by the Dominion in interesting ways.

Every summer the government steamship "Beothuk" makes a patrol of the eastern coast and islands, leaving the red-coated police from their lonely posts, dropping explorers, geologists, ornithologists and other officials to continue the work of discovery, and keeping the scanty and scattered population of white men and brown in touch with the necessities and some of the comforts of civilization.

This year the ship's personnel included Capt. E. Falk, master; Capt. J. D. Morin, ice pilot, and 44 officers and men. George P. Mackenzie was the officer in charge, and other members of the expedition included members of the Royal Canadian Mounted Police, two artists: Dr. M. Forslid, a Danish natural scientist; two men from the University of Michigan, and Dr. Peter Heinbecker of St. Louis, Mo., who is engaged in a study of the Eskimos.

The police made their usual long and arduous patrols about the islands, every man accomplishing in his line of duty what would make the reputation of a private explorer, and doing much to put this vast, inhospitable territory "on the map." While much of it is under ice for the greater part of the year, much of it rock and mud, its potential wealth in the matter of minerals, especially coal and copper, of fish and pasture, is not to be despised. As the "roof of the world," and on the shortest air routes between Europe and the Orient, it offers strategic airports for the flying fleets of the future. Canada has long ceased to be a narrow strip extending along the northern border of the United States. It is now as high as it is broad.

Danes Are Valuable Asset

Nova Scotia Finds Settlers From Denmark Very Industrious

Immigrants are fast becoming a valuable asset to Nova Scotia. During the last two years, 165 Danish settlers, comprising forty families have bought farms, 25 of these families making their purchase this year. A large proportion of the farms, situated in Hants County and throughout the Annapolis Valley, were vacant and non-producing, while some were barely habitable. The industrious Dane's tax support in maintaining schools and other municipal and community institutions is just beginning to make itself felt. They have brought \$50,000 new capital into Nova Scotia, and confidence in their ability to derive a living from the soil is well established.

Keen On Education

Children Of South African Natives Given Every Opportunity

"Natives are extremely keen on education, and the fathers will do all in their power to give their children sound education. Domestic requirements, however, are such that it is often impossible for native children to attend schools more than every other day, owing to their being wanted to herd cattle or do other small jobs in the locations." This was the testimony of J. C. Ross, inspector of native schools in the Transkei, before the Native Economic Commission at Kokstad, recently, according to the Cape Argus' correspondent at that place.

Wife—"I've bought you a beautiful surprise for your birthday—it has just arrived."

Husband—"I am anxious to see it."

Wife—"Wait a minute and I will put it on."

During a heat wave in Eastern Spain in November the thermometer in Barcelona registered 80 degrees in the shade.

"You have grown grey in my service! Then use a hair dye."—Der Lustige Sachse, Leipzig.

W. N. U. 1874

Queen Settled Controversy

Victoria The Good Submitted To Operation Under Chloroform
Popular belief, particularly among British people, is inclined to bestow exclusive credit for the discovery of anaesthetics upon one of the worthiest names in the annals of medicine — Sir James Young Simpson, of Edinburgh. On the evening of the 4th of November, 1847, Simpson and two assistants, after experimenting with certain fluids, collapsed unconscious on the floor. Chloroform had been discovered. "This is far better and stronger than ether," was the first thought of Simpson, on his return to consciousness. "This will turn the world upside down." It almost did. Announcement of the discovery was followed by one of the bitterest, fiercest, and most fantastic controversies that has ever enveloped the story of scientific progress. Chloroform was declared to be unconstitutional, unnatural, and in defiance of the laws of God.

"So are railway trains and steam-pouts," retorted the gay Simpson, who seems to have enjoyed the battle of wits to the full. And while theologians aimed broadside after broadside of Scriptural proofs in his direction, he responded vigorously with the same kind of ammunition, displaying a knowledge of Holy writ, at least as comprehensive as their own.

To the quiet courage of the young Queen Victoria, mother of the country, for the cession of hostilities was due. At the height of the verbal combat, she cheerfully submitted to an operation under the influence of chloroform. Its use was an unqualified success, and shortly afterwards the dense smoke of battle cleared away, leaving science victorious.

Time For Advertising

Skillful Advertising the Best Means Available For Stimulating Buying Urge

The Galt Reporter recently commented upon the decision of a well-known cereal manufacturing company to treble its advertising partly as a means of increasing its own business and partly as an example to the public. The management of the enterprise in question believes that even though hard times are present a great proportion of the people are still in a position to live comfortably—and to spend money freely—to keep money in circulation, to the advantage of the whole community.

The other side of this argument is that people of means, who hoard their resources unnecessarily during this temporary economic depression, are selfishly and unworthily increasing that depression. Those who have money cannot justify themselves in wearing old clothes and in tightening their purse strings when the position of their fellow-citizens requires that they should spend more, rather than less, upon necessities—that they should be more liberal than in ordinary times in their daily outlay.

Skillful advertising is the best means available for stimulating the buying "urge" in those who have more to spend. Merchants who use the press in relating the interesting story of what they have to sell not only increase their own sales, but in so doing they are popular benefactors. They are helping to improve general business and to increase employment.—Toronto Mail and Empire.

Onion Production

Movement Made To Popularize Canadian Product

Onion production reached the peak of all time in Canada in 1930. The bulk of the crop now comes from Ontario, with British Columbia a close second, and Quebec contributing a substantial quantity.

Canadians are to have a special opportunity of becoming acquainted with the high quality of the Canadian-grown onion during Canadian Onion Week.

The department of agriculture through the fruit branch, is co-operating with the Ontario Onion Growers' Co-Operative Association and the provincial governments in popularizing the Canadian product.

A Homely Remedy

The Vancouver Sun says: Among the multitude of those advising this or the other method of solving the wheat-farmer's problem, none has gone to the crux of the matter as Mr. Beatty has done. There has been talk of guaranteed prices, of moratoriums and of hundred-per-cent pools. It has been left to Mr. Beatty to suggest a simple, homely remedy, the raising of cows, pigs and hens."

For 25 cents one may enjoy all the sensations of flying, including banking, stalling, spinning and other aerial "stunts," in a model aeroplane which does not leave the ground, at a London sporting club.

EXPRESS MAN RETIRES

A colorful figure in the transportation field in Canada leaves active service in the retirement of J. E. Sutherland, general agent of the Foreign Department of the Canadian Pacific Express Company, Toronto, who went on pension as from the first of the year, after more than 43 years with the company. Mr. Sutherland entered the company's service as a messenger between Toronto and North Bay in September, 1887. He passed through various promotions to the general agency to which he was appointed in 1926. Matters formerly referred to Mr. Sutherland are now being handled by H. Pickering, agent, Foreign Department, Canadian Pacific Express Company, Toronto.

High Quality Of Canadian Cheese

Canadian Product Sells At Premium Of Nearly Three Cents A Pound Over Nearest Competitor

Since the institution eight years ago of a cheese grading system, Canadian cheese has gradually climbed to a position of pre-eminence in the markets of the world. Dr. J. A. Ruddick, dominion dairy commissioner, declared in an address before the annual convention of the Dairymen's Association of Western Ontario held in London, Ont. On the world markets, he said, the Canadian product has been selling at a premium of nearly three cents a pound over that of its chief competitor, New Zealand.

In 1923 New Zealand cheese had been selling nearly one cent higher than Canadian cheese on the Old Country markets. That year grading was inaugurated in Canada, and since then, Dr. Ruddick declared, the average premium for Canadian cheese had varied from one-half cent a pound in 1924, to two cents in 1929. The high point had been reached early in December last, when the difference was four and one-half cents.

"Now," Dr. Ruddick continued, "I have not made these comparisons to baffle New Zealand cheese. My object is to encourage Canadian cheesemakers to stick to the policy of producing the close, firm boiled cheese favored of the true Cheddar type, for it is that quality in our cheese which secures the premium and which now amounts to at least \$2,000,000 a year."

The grading returns show that quality was well maintained in 1930, but it should never be overlooked that the standards of quality in the world's market tend to become higher year by year. There must be no relaxation of effort to produce nothing but the best. The result can be attained only by co-operation and team work on the part of the milk producer, the factory owner and the cheesemaker.

Huge Lemon On Dwarf Tree

San Francisco has no monopoly on claims to superlatives, when it comes to citrus fruit. The Garfield Park conservatory at Chicago, now comes forward with an announcement of a lemon growing beneath its glass that is of the enormous size of a honeydew melon.

Moreover, the lemon is growing on a dwarf tree.

Customer: "The sausages you sent to me were meat at one end and bread-crumbs at the other."

Butcher: "Quite so, madam. In these hard times it is very difficult to make both ends meet."

More meat is being consumed in Germany now than in pre-war days. Berlin has taken the lead, the annual consumption being 154 pounds for each citizen.

Lady: "Isn't it wonderful how a single policeman can dam the flow of traffic?"

Boy: "Yes, granule; but you should hear the bus drivers."

Ripe blackberries were picked in a garden at Barmouth, England, in December. —Esquelle, Barcelona.

To Preserve B.C. Salmon

May Be Found Necessary To Place Restrictions On Fishing

As a result of raids by pirates on commercial fishing grounds along the coast of British Columbia, the Canadian Government may soon restrict the number of fishing boats and nets preying upon salmon as they come in to spawn, according to Richard J. Gosse, chairman of the Canned Salmon Section of the C.M.A., and managing director of British Columbia Packers, Ltd.

In an interview in Toronto, Mr. Gosse said that while organized members of the fishing industry on the Pacific coast were grappling with the interference of "outlaw" packers and fishers, a former member of the Federal biologists board was now in Europe attempting to evolve a new revolutionary method of preserving fresh fish.

"The salmon of British Columbia," he said, "belong to the people of Canada and not to the canners or to the commercial fishermen."

"If 1,000 boats or nets are operating in a single district, usually within the mouth of a river or at sea, two days a week must be observed as a closed season by the cannery and their affiliated fishermen. If 1,000 or more boats operate the weekly closed season is increased by 12 hours. A gentleman's agreement has been made by the organized packers, at the suggestion of the government, limiting the boats to operate in any district up to 1,000."

World's Largest Crane

Most Powerful Machine Of Its Kind In The World Installed At Port Weller

A gate-lifting crane, said to be the most powerful piece of machinery of its kind in the world, has recently been installed at Port Weller, the Lake Ontario entrance to the new Welland Ship Canal. This huge crane was built at Collingwood, Ontario, on the Georgian Bay, a shipbuilding center and popular resort for tourists, at a cost of \$1,500,000.

The crane is capable of lifting 500 tons, and has been constructed for use in case of emergency to lift the huge canal locks gates, including those at Thorold, each leaf of which weighs 500 tons.

The gate lifter is built entirely of steel from top to bottom, with walls, partitions, floors, ballast and buoyancy tanks all of steel, and will be operated by the pressing of a button in the small control room where one man will manage the mass of synchronized power. The gate lifter is powered throughout by electricity, its own plant generating more than twice as much power as is required in its work. A steam engine with modern oil burners is used for generating the power.

In addition to the 500-ton vertical hoist the crane has a utility boom which can be swung to would the ordinary crane or derrick, and which is capable of lifting 125 tons.

Ship Carried Tall Mast

Highest In World Said To Be On British Clipper

What is the highest mast ever carried by a ship? The question has arisen because Shamrock V's mast—162 feet high—is the tallest on record for a racing yacht.

As a matter-of-fact, it is quite a tall mast for any ship. A usual height for the mainmast of a big sailing vessel is 150 feet from deck to truck. The truck is the wooden disc at the top of the mast.

Perhaps the highest mast ever known was that of the Harbinger, which was about 200 feet from deck to truck. It was one of the British clippers. An American ship, the May Flora, has also been described as the loftiest ship, but it is doubtful if it was really any taller than the Harbinger.—Answers.

B.C. Apples For South America

Indications of a growing export trade for British Columbia apples are shown in the increased shipments to the Argentine. In the year 1929 a small consignment of British Columbia apples was sent to Buenos Aires with the result that nearly 30 carloads have been arranged for shipment this season to the Argentine capital.

Germany's natural supply of helium is so limited, German scientists say, that it would take 40 years to fill the Graf Zeppelin with helium from Germany's four known deposits.

Lady: "Isn't it wonderful how a single policeman can dam the flow of traffic?"

Boy: "Yes, granule; but you should hear the bus drivers."

Oil-bearing shale in Colorado alone would supply the world's oil needs for the next few centuries—if a cheap method of extracting the oil could be found.

A Peaceful Community

Barrow, Alaska, Claims To Be Most Law-Abiding Place In The World

The most law-abiding community in the world—that's what Barrow, on the northern tip of Alaska, calls itself.

And Barrow has a pretty good claim. There hasn't been a court case of any kind there for 25 years, and there has been no murder committed for 50 years, according to Alfred H. Hopson, Sr., trader who has lived there since 1880.

There are 300 native Indians at Barrow. They are mild-mannered, friendly to each other, big-hearted, and strict in their observance of God-made and God-made laws. Morality is of the highest type and robbery is unknown. Fish, whales, seals and animals provide plenty of food and clothing for all, and so long as an Eskimo has food and skin clothing, he is satisfied.

The Eskimos have been fortunate in having gull outside influence kept away. Only a dozen white people live at this isolated point, and for the past 25 years they have been of a high type. Mongomery is strictly adhered to by the natives.

Eskimos in some sections of the North used to be more or less warlike, but those living at Barrow are like peaceful, Even-tempered and of happy disposition, the northern Alaska natives are believed by many missionaries and traders to be the highest type of Indian in the world.

Suitability Of Seed Grain

Care Should Be Taken In Using Only Seed Adapted For District In Which Is To Be Grown

"There are just as many people ready to try a new variety of grain as to try a new religion," suggested J. C. Mitchell at the meeting of Saskatchewan branch of the Canadian Seed Growers' Association. He urged that experimental farms should not scatter new varieties of grain broadcast over the country but find first for which districts they were adapted. Garnet wheat, as an example, had been started in his home neighborhood near Moose Jaw where it was quite unsuitable.

He had been hearing a good deal lately about fertilizers, and he expected that the same thing would happen with these. People would waste their money on them in districts for which they were quite unnecessary when, with the soil survey, it would be possible to place them only in the districts for which they were adapted.

Would Start Ball Rolling

Prosperity Will Come Back When Advertising Gives It A Push

Roger Babson sees advertising as the means to start the ball rolling in a business way. Advertising will provide the necessary push to bring prosperity back, the eminent American economist says. He adds:

"The tired consumer is getting ready now to put his money to work. And he has more money than he has ever had before; remember that this depression has had little effect on his savings. But he has been holding it back. Now he is ready to let loose. Bank and industrial institutions are likewise approaching the mood where they will loosen the strings around their idle funds."

The world's most successful business houses know that advertising is the lifeblood of business, and that it is more than ever necessary and vital when conditions are depressed.

Dairying In Alberta

Cream Receipts By Various Creameries Show Big Increase

Figures published by the Provincial Dairy Commissioners show that cream receipts by various creameries in the Province of Alberta were forty per cent. greater during November 1930, than in the same month of 1929. There were 611,480 pounds of butter fat received as against 575,000 pounds during November, 1929. Receipts for the first eleven months of the year ran to 14,452,063, or an increase of about ten per cent. over the corresponding period of 1929.

Honest Work For Everyone

There is only one road to salvation—the road of hard, honest work for everyone. That no time for any employee to insist upon maintaining wages at levels which dislocate industries cannot pay and survive or for any employer to use the emergency to smash wages below the bare line.—Perth Western Mail.

Oil-bearing shale in Colorado alone would supply the world's oil needs for the next few centuries—if a cheap method of extracting the oil could be found.

Pasteurized Milk

All Milk Should Be Pasteurized To Be Absolutely Safe

(By John Burke Ingram.)

Did you know that you can poison yourself with milk?

Strictly speaking it is not the milk which sometimes brings sickness and death with every swallow, but the germs of diseases which stupid or careless men sometimes permit to lurk in the milk. Here are two rules about milk. Rule number 1 is, drink as much pure milk as you can, and give your children as much as you can persuade them to drink. Rule number 2 is, don't drink a single mouthful of impure milk. Now the question naturally arises—how does one tell pure milk from impure milk? The answer is that you can't—unless you are a trained analyst with a scientific laboratory at your disposal. So you see that puts the average person in a peculiar position. He should drink as much pure milk as he can, and should drink no impure milk whatsoever, yet neither taste, colour, smell or in any other simple test can he tell good milk from bad. Why then do I bring this to your attention in this health article?

I did so because there is one great practical defence against the invisible disease, germs which often lurk in our milk and that is "Pasteurization." What is pasteurization? It is a process named after the great Louis Pasteur, who toward the end of the last century made certain scientific discoveries which have already saved hundreds of thousands of lives. This process of pasteurization is extremely simple, and very inexpensive. It is so simple and inexpensive that any community, however small, which allows its citizens to die of diseases which are carried to them by impure milk, is guilty of criminal negligence, morally if not legally. All that has to be done to milk is to heat it to 145 degrees Fahrenheit, to keep it at this temperature for thirty minutes and then to rapidly cool it to forty-five degrees Fahrenheit. Keep it cool until it is consumed.

Now as to the cost of this process. Dr. J. W. S. McCullough of the Ontario Department of Health, and one of Canada's leading public health experts, states that the average cost of pasteurizing one gallon of milk is less than one half-cent.

From this one may gather how selfish and criminal are those small-minded milk dealers who oppose pasteurization because it adds to their costs. Fortunately such persons are very much in the minority and the average man engaged in this business today is an up-to-date business man anxious to serve his community with credit as well as profit to himself. Milk is such a wonderful food that it is indeed a shame to let disease germs spoil it for us. It has everything needed in the diet, according to a booklet issued by a great Life Insurance Company. It is a complete mixed diet in itself. It has sugar and fat which give energy (force) to move the body—like coal to the engine; it has mineral salts which build up the bones and keep the body in good shape; and albumin (protein) which—like meat or white of egg—is important in making brain and nerves. Of all the different kinds of protein to be found in food, the best is found in milk. Sugar, mineral salts, fat, and protein are all necessary in a well-balanced diet. But those substances without vitamins top not nourish the body or promote growth.

Doctors everywhere agree that for children especially there is no such food as milk. Everyone should drink milk and plenty of it but it should be pure milk. It should be pasteurized milk. Radio Fans Increasing

Radio fans in Canada are increasing in numbers. During the first nine months of the present fiscal year 48,382 more radio receiving licenses were issued than during the whole of the fiscal year, 1929-30. Licenses issued in the first nine months of 1930-31 totalled 472,631 compared with 424,146 in 1929-30. Licenses issued in Saskatchewan and Alberta showed a falling off.

Nearly 600,000 tons of caustic soda are produced in the United States annually.

"You have fished an hour and caught nothing."

Don't Gamble With Health

We all know health demands absolute inner cleanliness. But what we often don't realize is the risk we take when we use harsh, gritty purges that create a strained, unnatural condition.

ENO'S is pleasant, gentle, safe and sure.

A daily dash of **ENO'S** "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, listlessness, quickly disappear.

CHAPTER IX.—Continued.

"We've had dreadful times these last two years, you know. I was so wretched before little Nick arrived that I had help with the housework all the time, and the nurse stayed six weeks instead of three. Nick just won't scramp at such a time, but to go into the lonely house, Nick raised his eyes once more to the maid-servant's curious, bright, buoyant feeling sweep through him; a phrase from the Gypsy song that Angela Halliday had sung, sprang to his lips; while in the tender starlight the broad highway beckoned and called with its old allure.

CHAPTER X.

On the following Sunday, at the very moment when James Halliday was the station in Boston, taking a train for the little town only fifty miles from Bakersville, where his mother first drew the breath of life, and where she had asked to be laid to rest, Simeon Bartlett pushed his chair after finishing a satisfying meal, and said:

"Gay, I got a scheme. I don't want to be seemin' to speed the partin' guest, but it just come over me that maybe Mis' Bemis' Josh could take you home, to-day. He works to the garage, and if I can hire a car'd drive us over. There ain't nobody else in State Line I'd trust to do it, and we can't get off only Sundays. We've had a cool spell, and by Wednesday a hot wave's liable to hit us, and travellin' back by train wouldn't be no fun. If you say the word I'll ride back with you today, and then come home along o' Josh; and when Nick comes back tonight he'll find a surprise."

Gay, who had been fighting homesickness for the last two days, readily agreed; while Simeon, always delighted at fresh adventures, shivered with joy at the idea of seeing "Daddy," thought he sobered instantly at the thought of leaving his beloved chick-ens.

"Couldn't me take one home, Uncle Slim?" he asked wistfully. "Couldn't me take Snowball? Sonny'd be care-free and not hurt his leg horns."

Mrs. Bemis, hastily biting a smile behind her napkin, left the room; but behind Simeon, whispering soberly: "I don't doubt the leg horns would be safe and sound. So, but roosters don't think much of automobiles, and I guess Snowball would be happier to stay at home. Most likely he'd be lonesome for his wife an' babies."

"Same as Daddy?" questioned the little boy, and Gay, smacking him up, kissed him tenderly.

Oh, it would be full to surprise Nick! she thought happily. If he were late, and the children were in bed, she would sit on the porch in the darkness, and how glad he would be when he found her! Simeon, watching the glow in her starry eyes, felt well repaid for his sacrifice in sending them home three days ahead of time.

It was five o'clock when they reached Bakersville, Uncle Slim saw them safely in the house—carried in the milk and eggs and a baked chicken that Mrs. Bemis had insisted on their taking, and despite Gay's urging that he stay a day or two, departed with Josh Bemis, much to the regret of Sonny, whose lip trembled as he clung to the old man in a last hug.

"There! there!" said Simeon, his own eyes moist as he unclasped the chubby arms from round his neck, "Uncle Slim'll be comin' back in no time, and maybe before you get to

sleep Daddy'll be here. You take good care o' Mother now, and don't let nothin' happen to her, will yer?"

"Nope," promised Sonny, and bravely swallowed a sob as the old man turned to put his cheek lovingly against the baby's, and to kiss Gay.

"You don't by no means feel nervous here alone, do you?" he asked anxiously.

It had been a beautiful day, but now the sun was behind a cloud, and a rumble of distant thunder stirred the air.

"No," Gay answered, "but I don't like your starting off if a shower's coming."

"It isn't aimed in our direction," said Simon, studying the heavens, "but if it overtake us we'll get shelter somewhere. You don't need to worry about us. There's Julie Nipp over on the Halliday's back porch. She'll tell her to come over here if the storm gets bad. She'll come pay any bill, and we'll ought to have a nice back. As far as we won't get home much after dark."

"Then you mustn't letter home, Uncle Slim. But I haven't thanked you for your visit, or said half enough about your wonderful gift. Next time you come to Bakersville I shall look like a bird."

"You look like one now," said Simon, "with yer eyes shinin' like that. Well, dearie, I must be gettin' on. Don't hardly know what Mis' Bemis am m'eell do without you. Give my love to Nick, and tell him his property ain't deteriorated any since I borrowed it."

Gay laughed.

"I should say it hadn't! I feel like a new woman altogether, and the babies have never been so rosy."

As the car started she lifted her baby high, while Sonny clinging to her skirt, waved a farewell. Simeon craned his neck to watch the picture till the car turned into Main Street. The clouds had darkened suddenly, and the horizon seemed gloomy as Gay and the children went within. She switched on a light for cheer, and looked about at her own beloved domain.

"Nick's done pretty well to keep away as neat as this," she commented, as she went to the kitchen to put away the milk and eggs. The remains of a hasty breakfast was in the sink, but except for the inevitable accumulation of dust, things were not hopeless. "In an hour I could do wonders," Gay mused, "but unless these clouds lift it's too dark to see. I'll be frightened tired by bedtime if I do too much. I'll just make the beds, and later on slick up the kitchen. The babies will be ready to turn in early. I wish" (with an anxious glance at the lowering sky), "I wish Nick could come before dark."

She had started upstairs, the baby in her arms, when a voice at the door arrested her, and she turned to see Jim Nipp, who was carrying her bobbed hair, slightly angry.

"I see you come home," she announced, stepping inside, "and thought maybe I could help. I'll keep one eye out the window and if Mis' Halliday gets back I'll cut an' run through that hole in the hedge, an' she'll never know I left the house."

"Think of her not lettin' me off when she's gone all day—and her not home either! And Sunday! I never did see such a minute except the pay's so good, and sometimes she gives me her old clothes. Say! that lightnin's somethin' fierce!"

(To Be Continued.)

Complete in itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

In quarries where beryl is found, workmen say that this mineral is a good prophet of weather changes, becoming deeper in color as humidity increases.

Australia's iron and steel production is increasing.

Canadian Newspaper Has Long Record

Brockville Recorder Celebrates Its 110th Anniversary

Started on January 16, 1821, by Chauncey Beach, an itinerant printer, the Brockville Recorder, a weekly newspaper, has just celebrated its one hundred and tenth anniversary without a break.

During the past three years

newspapers have been made for drunkards.

No citizen of Louisburg within the last ten years has served a sentence in the county jail or appeared in either the county or supreme court on a criminal charge.

When the Nova Scotia Temperance Act was passed, Louisburg had no government vendor, and no attempt was ever made to appoint one.

Under the present government control act, no liquor store has been opened in Louisburg. When the plebiscite on the liquor question was taken, the town voted two to one against government control.

The newspaper was established by members of the Buell family, acting in conjunction with Beach, as a supplement to the Family compact in Upper Canada, and Andrew N. Buell, later master in chancery at Toronto, who, as a law student, wrote the inaugural address in the first issue of 110 years ago, stamped the publication in the strongest terms as a reform journal. It has since remained a supporter of liberal policies and principles.

Always on Hand

To be always kept on hand is a sure sign of appreciation of a medicine. Baby's Own Tablets hold this enviable distinction in thousands of homes from one end of Canada to the other. Dr. J. C. Sheldiac, M.D., is one of the young mothers who appreciate the Tablets. She says:—"Baby's Own Tablets are the best I have used them for my little one for two years and a half and keep baby happy."

Baby's Own Tablets are a mild but thorough laxative. They regulate the stomach and bowels; relieve indigestion; break up colds and promote sleep. They are sold by medicine dealers on a mail order basis.

They are also a aid to the Dr. William's Medicines Co., Brockville, Ont.

The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter. All letters addressed to the editor must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum. Canada \$1.00 outside of Canada.

The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per cent line. Legal advertising, 15c per cent line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

Heard Around Town

Born.—To Mr. and Mrs. Strong of Rearville, in the Cereal Hotel, on Sunday, Jan. 18th, a son.

Mrs. M. F. Sutor, Rearville, entertained a number of ladies from town Wednesday afternoon.

Mrs. Ida Flater returned from Oyen Wednesday and intends to stay a couple of weeks at her home in Chinook.

Mr. and Mrs. Herb Bradford and little daughter Jean, and Miss Mae Todd, of Oyen, were Chinook visitors Monday evening.

Mrs. McKee and baby, of Coronation arrived here on Monday and will spend a month visiting at the home of her mother, Mrs. M. Bjork.

Audrey Rideout took very ill Sunday afternoon with ear trouble; Mr. and Mrs. Rideout left Wednesday morning to take Audrey to an ear specialist at Calgary.

The Ladies' Card Club met this week with Mrs. C. Peterson, Mrs. A. V. Youell holding the highest score. Next week's meeting will be at the home of Mrs. W. A. Hurley.

Remember the annual Burns Night Concert and dance in the school hall tomorrow (Friday) under the auspices of the Chinook and District Agricultural Society, commencing at 8 p.m.

The regular monthly meeting of the Chinook Women's Institute will be held Wednesday, Feb. 4, at the home of Mrs. Lee, Mrs. Youell and Mrs. Lee hostesses Roll call: Goods manufactured in Alberta.

The Trail Rangers will hold a social evening, consisting of lantern slides, at the church Saturday, Jan. 31st, commencing at 7.30 p.m. Lunch will be served, Silver collection. Come and patronize our boys.

Mrs. Leonard Cooley entertained a number of young people on Friday evening to Court Whist. Mrs. J. Cooley was the winner of the ladies' prize, W. H. Butts the winner of the gentleman's prize. Consolations went to Mrs. O. Nelson and Mr. Code.

Rearville News

Born on Dec. 10th, at Montreal, to Mr. and Mrs. Holquist, a son. Mrs. Holquist is a daughter of Mr. and Mrs. John Walzac of Rearville.

Don Robertson left on Wednesday for a visit to Mr. and Mrs. Clarkson at Pinkham, Sask.

Robert Holder and family were Sunday guests at the home of Wm. Forgie.

Mr. and Mrs. M. F. Sutor spent Sunday at the home of F. Nelson, at the Red Deer River.

Miss Annie Forgie, of Youngstown, was a Chinook visitor last week.

H. E. Robinson has installed a radio.

Kinmundy

Mr. and Mrs. A. Strand and daughter Gladys were Sunday guests at P. Seeger's.

The dance at Flaxland was well attended. There was a nice crowd and a good time was enjoyed by all present.

Robert Youngren and Douglas Wheeler went east last Friday evening on a goose hunt, but came back without any birds.

L. S. Brown, who has been living in this district for a number of years, is returning to his old home in Glasgow, Scotland.

Paul Seeger had a blowout going to the dance on Friday last, so he had to go without a tire. On the way home his engine got hot and lost all the water from the radiator, so he had to walk home for water.

New President Popular

In the press reports of Mr. Gardner being chosen president of the U. F. A. the statement was made that he was elected to Parliament in 1921-26 and 1930.

In the recent election, one of the most hard-contested the country has ever witnessed, Mr. Gardner had no opponent in Acadia constituency. He was one of two members in Canada to be returned by acclamation. This is conclusive evidence of the high esteem in which Mr. Gardner is held by friend and political opponent.

One is reminded of Gray's Elegy: "The applause of listening Senates command."

Admirer, Calgary Herald,

New Baptist Pastor

Acceptance of the call extended to him by First Baptist Church, Calgary, has been telegraphed by Rev. F. W. Pattison, of Northfield, Mass.

Rev. Mr. Pattison, who was a recent visitor in Calgary, preached several sermons at First Baptist. In his telegram he stated that he would be able to preach his first sermon in his new pastorate on Easter Sunday.

Dr. Bingham's successor has been the pastor of Moody Church in Northfield for the past fifteen years, and twenty-four years ago was a student pastor at Olds, Alberta. In his experience he has acted as assistant pastor to Rev. F. W. Meyer in London, England, Calgary Herald.

Here and There

(680)

Forty years of service with the Canadian Pacific Railway have received recognition in the appointment of George Hodge, assistant general manager, eastern lines, to be manager of the newly-created department of Personnel of the railway, announced by Frank Hall, vice-president of the company recently. Mr. Hodge was specially selected for this position in view of his wide experience in labor matters and his particular flair for arbitration and kindred activities. He was especially in the limelight in the case of the Moorswood and when his presentation of that situation evoked unfeigned praise in Canada and the United States.

Likelihood of a large entry list from the Prairies for the third annual Empress Hotel Midwinter Golf tournament to be played at Victoria Golf Club, Jan. 27-28 is indicated in inquiries coming in from leading amateurs of the plains. Last year the journey brought together 150 leading men and women golfers from both the Pacific and the Prairies and it was the plainmen who upset the dops by carrying off important portions of the silverware against the best of Victoria, Seattle, Vancouver, Tacoma, Portland and Spokane.

Church Announcements**CHINOOK UNITED**

CHINOOK CATHOLIC Service Second Sunday Every Month. Mass at 8 a.m.

Health From The Housetops

The world and his wife—especially the wife—have of late years acquired a health consciousness hitherto unknown in the days when castor-oil babies were the rule.

The reason of this thirst for information is perhaps because of the ease by which the knowledge of hygiene may be obtained. Formerly a wealth of wisdom on health lines was the possession of the medical men only, who were content that the layman should remain outside the chained inner circle of power, and of woman's ability to comprehend the laws of hygienic living they had but a slight opinion. Hence the difficult dicta, the hieroglyphic writing, the incomprehensible names in which diseases were shrouded.

All has been changed. Health is shouted from the housetops. Every newspaper carries its health articles. Mothers to be are learning studying prenatal care. Grandmothers attend clinics with their grandchilden to see them weighed and measured. Health is everybody's business. No longer, through lack of information, must

To Bring Bermuda Next Door

Already the winter playground of many Canadians, Bermuda will be brought even closer to Canada by the inauguration, January 31st, of a weekly liner service by the Canadian Pacific Liner Duchess of York. V.C. D.S.O., commander of the Duchess of York, will bring the liner from the port of Bedford on route to the West Indies. The island—or, to be correct—the 356 coral islands that form Bermuda in addition to being the closest summer vacation resort to Canada is famous for hills, golf and bathing. Canadian professionals from Toronto and Hamilton are familiar faces on two of the many fine

courses of which Bermuda boasts, and excellent bathing both on beaches and in open-air sea-water pools is a feature.

Already the Duchess of York, the ship which

will bring the liner to Canada, has been named after the Duchess of York.
